SKILLS

Programming Languages: Python, C++, Java, JavaScript

Web Technologies: HTML, CSS, Node.js, React

Databases: MySQL, SQLite

Tools & Software: Git, VS Code, Scilab, LTspice, Cisco Packet Tracer, Quartus II, edsim51di

Operating Systems: Windows, Linux, Ubuntu

Hardware/Embedded Systems: Basic Circuit Design

LANGUAGES

ENGLISH | MALAY | MANDARIN

NEOH WEI JIAN

DIPLOMA IN COMPUTER ENGINEERING

PROFILE

Highly motivated and detail-oriented Diploma in Computer Engineering fresh graduate seeking a job opportunity. Eager to apply foundational knowledge in programming skills, system design, and software development to contribute to innovative projects and gain as well as enhance practical industry experience with my professional growth.

EDUCATION

Universiti Malaysia Perlis (UniMAP)

Course: Diploma in Computer Engineering

Year: Year 3

Scholarship: PTPTN

CGPA: 3.45

EXPERIENCE

Software Engineering Intern at ECTrons SDN BHD

- Assisted in the development of web applications as part of the software engineering team.
- Worked with real-time communication technologies such as WebSocket and MQTT.
- Participated in building and maintaining website features and functionality.
- Collaborated with developers to debug issues and improve application performance.
- Gained practical experience in software development workflows and version control.

FINAL YEAR PROJECT

Title: Barcode Filing Management System

Role: Lead Developer | System Designer | Programmer

- Developed a web-based Barcode Filing Management System (BFMS) using HTML, CSS, JavaScript, and SQLite.
- Integrated barcode scanning to improve document tracking and reduce manual errors.
- Designed system architecture and conducted testing to ensure reliability.
